### Control the temperature with your mobile phone

With *emPower* from **Alarm Engineering**, you can reduce your energy usage without sacrificing personal comfort when it comes to heating and cooling your condo, home or business. *emPower* gives you greater awareness and control of your property's energy usage than ever before with anytime, anywhere access to your thermostats through web and mobile devices, and real-time alerts when a thermostat setting is changed or the temperature goes out of range. You can easily control all of your thermostat settings through our user-friendly website and mobile apps. It's easy to customize settings for each of your thermostats to fit your needs – whether you're keeping a comfortable temperature or looking for ways to save energy. Receive alerts if the temperature drops below a certain threshold in the winter, preventing frozen pipes and expensive repairs. Remotely adjust the air conditioning or heat before you head for the beach, and arrive to your condo in comfort.

Thermostats

### Light up your life

With *emPower*, you can create custom light schedules and automatic, event-triggered lighting rules that are designed to fit your condo, home or business routines. With remote control from across the room or across the world, *emPower* offers a variety of light automation options for enhanced security and convenience, while also helping you save energy.

Lights

### Be there, even if your not

Check in on the second home or condo from anywhere and view live or recorded video clips on your PC or compatible cell phone. Our solutions can provide you with remote video capabilities anywhere you have broadband internet access.

### Peace of mind

Alarm Engineering has been securing the homes, businesses and vacation properties of Delaware, Maryland and Virginia since 1985. Our state-of-the-art central monitoring service provides around the clock monitoring for intrusion, fire, carbon monoxide and a host of other scenarios in which authorities need to be dispatched and/or property owners need to be notified. Our solutions not only provide you with the remote control and awareness of your property and its condition, but also the security and peace of mind knowing your investment is secure. Our systems may also qualify you for insurance premium discounts.
